

Mini greenhouse for growing seedlings

It is an excellent solution if you want to speed up the germination of seeds. Its use enables vegetables and flowers to grow in suitable conditions.

Benefits

- The mini greenhouse allows vegetables and flowers to grow in the right conditions: it provides a bright and warm place for the plants.
- Regular ventilation is required!
- The trays are made of wood fiber, so the plant can be planted together with the pot in the garden without disturbing the plant.
- The peat trays can be easily cut apart, so we can plant the plants separately.
- It is recommended to put special potting soil in the peat pots.

Characteristics

- Material: wood fiber and plastic
- Colour: the plastic tray is brown and black, the roof is transparent and the clay pots are brown
- Size: 52 x 17 cm
- The Growing Kit contains 28 planting places, which are 5x5 cm in size.
