SOLAR CERAMICA

Decorative ceramic candle jar, linked to a solar panel

This beautiful decorative ceramic transforms into a solar candle jar as soon as night falls. Its openwork patterns allow a wonderful play of shadows and light to filter through.

Benefits

Produced in traditional ceramic, this solar decoration to lay on a surface, with openwork patterns, brings a note of refinement to outside spaces.

The light diffused inside the ceramic creates a warm atmosphere

Natural or geometric inspiration patterns.

A very nice decorative object, in the daytime and at night.

Characteristics

Openwork ceramic pot, metal handle and plastic solar cover.

1 white LED.

Solar panel.

1.2V - 300 mAh AA Ni-MH rechargeable battery

On / off switch.
